

ABSTRACT OF THE DISCLOSURE

A method and apparatus for Font Emulation are disclosed. In one embodiment, the method comprises stripping a first portion from a first font to emulate a second font upon request for such a second font. In an alternative embodiment, the apparatus comprises a processor and a memory, the processor stripping a first portion from a first font to emulate a second font. The method and apparatus may further include stripping a second portion from a first font, and such may be performed by the processor. Alternatively, the method may include copying a first font into memory.
